

## Izovac EDS

### Indication

For active immunization against Egg Drop Syndrome (EDS 76).

### Presentation

1000 doses of inactivated EDS 76 virus in oil emulsion per 500 ml bottle.

### Vaccination Program

One vaccination with Izovac EDS between 14 and 20 weeks of age before the laying period.

### Vaccine Administration

From 14 weeks of age to 20 weeks of age administer 0.5 ml Izovac EDS by intramuscular or subcutaneous injection.

### Precautions

Store refrigerated at 2 to 8°C. Do not allow to freeze. Allow the vaccine to reach room temperature (22°C) before use.

Shake well before and during use. After opening use within 10 hours.

**In case of accidental human injection seek immediate medical attention.**

Vaccinate healthy birds only.

See Izovac EDS package insert for detailed Directions for Use.

Izovac EDS registered pursuant to the ACVM Act 1997, No. A10567. See [www.foodsafety.govt.nz](http://www.foodsafety.govt.nz) for registration conditions.
