

Avimex ibh 4/8

Indication

For immunisation of Broiler Breeders to protect their progeny from Hydropericardium Syndrome / Inclusion Body Hepatitis.

Presentation

1000 doses of inactivated Fowl Adenovirus serotype 4 and 8 per 500 ml bottle.

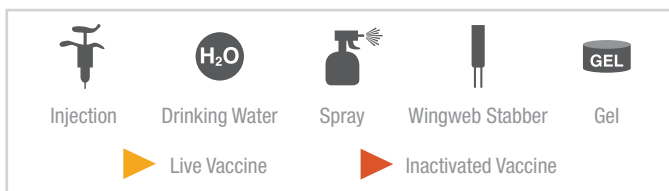

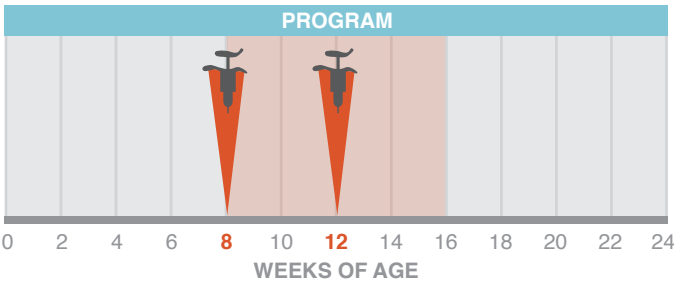

Vaccination Program

Broiler breeders are given two vaccinations with inactivated Avimex ibh 4/8 between 8 and 16 weeks-of-age with an interval of 4 weeks between the first and second vaccination.

Vaccine Administration

From 8 to 16 weeks-of-age administer 0.5 ml Avimex ibh 4/8 twice by subcutaneous injection.

There should be an interval of 4 weeks between the first and second administration of Avimex ibh 4/8.

Precautions

Store refrigerated at 2 to 8°C. Do not allow to freeze. Allow the vaccine to reach room temperature (22°C) before use.

Shake well before and during use. After opening use within 10 hours.

In case of accidental human injection seek immediate medical attention.

Vaccinate healthy birds only.

See Avimex ibh 4/8 package insert for detailed Directions for Use.
