

Izovac Coryza 3

Indication

For immunisation of Layers to prevent Infectious Coryza.

Presentation

1000 doses of inactivated *Avibacterium (Haemophilus) paragallinarum* Serotypes A, B & C in oil emulsion per 500 ml bottle.

Vaccination Program

Layers are given two vaccinations with inactivated Izovac Coryza 3 between 6 and 16 weeks-of-age with an interval of 4 weeks between the first and second vaccination.

Vaccine Administration

From 6 to 16 weeks-of-age administer 0.5 ml Izovac Coryza 3 by subcutaneous injection.

There should be an interval of 4 weeks between the first and second administration of Izovac Coryza 3.

Precautions

Store refrigerated at 2 to 8°C. Do not allow to freeze.

Allow the vaccine to reach room temperature (22°C) before use.

Shake well before and during use. After opening use within 10 hours.

In case of accidental human injection seek immediate medical attention.

Vaccinate healthy birds only.

See Izovac Coryza 3 package insert for detailed Directions for Use.
