Handling, Storage, Disposal, Spill Clean Up

	
Handling precautions:	Read product label and instruction leaflet prior to use. Wear protective clothing such as overalls and gloves when mixing and administering the vaccine.
Handling practices:	After administration of the vaccine remove protective clothing and wash hands before eating, drinking, chewing gum or using tobacco.
Storage:	Store diluent at room temperature in sealed original bottles, or may be stored with associated vaccine in a refrigerator at 2° to 8°C. Do not freeze.
Disposal:	Preferably dispose of the product by use. Neutralize vaccine container and remaining contents in a Chlorine Bleach solution prior to wrapping with paper and disposing in an appropriate garbage system.
Spill Clean Up:	Absorb or wrap material with inert material such as paper and rags and neutralize with Chlorine Bleach prior to garbage disposal. The vaccine should be considered a biohazard to poultry as it contains a live virus culture and disposal should avoid the potential risk of spread to non-vaccinated birds.

First Aid Measures

Inhalation:	Significant inhalation exposure is considered to be highly unlikely.
Ingestion:	If product is swallowed do NOT induce vomiting, wash mouth with water and give some water to drink. Seek medical advice if concerned.
Self-Injection:	Not applicable
Skin Contact:	Flush with lukewarm gently flowing water for 5 minutes or until product is removed.
Eye Contact:	No effects expected. If irritation does occur, flush contaminated eye(s) with lukewarm gently flowing water for 5 minutes or until product is removed. Remove contact lenses, if present and easy to do.
