Hazard Identification	
	
<b>Handling precautions:</b>	Read product label and instruction leaflet prior to use. Wear protective clothing such as overalls, gloves, goggles and face mask to prevent contact from vaccine especially when administering via spray.
<b>Handling practices:</b>	After administration of the vaccine remove protective clothing and wash hands before eating, drinking, chewing gum or using tobacco.
<b>Storage:</b>	Store in closed original container in a refrigerator at 2° to 8°C. Do not freeze.
<b>Disposal:</b>	Avoid disposal of unused vaccine it is best to use the product. Neutralize vaccine container and remaining contents in a Chlorine Bleach solution prior to wrapping with paper and disposing in an appropriate garbage system. The vaccine should be considered a biohazard to poultry as it contains a live bacterial culture and disposal should avoid the potential risk of spread to non-vaccinated birds.
<b>Spill Clean Up:</b>	Absorb or wrap material with inert material such as paper and rags and neutralize with Chlorine Bleach prior to garbage disposal.

First Aid Measures	
<b>Inhalation:</b>	Significant inhalation exposure is considered unlikely. Allergic type reaction may be possible in allergy sufferers. If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. Seek medical advice if breathing does not improve.
<b>Ingestion:</b>	Do NOT ingest. If product is swallowed vomiting may be induced, wash mouth with water and give some water to drink. Seek medical attention if the person feels unwell. Ingestion of the product may cause diarrhoea.
<b>Self-Injection:</b>	Not applicable.
<b>Skin Contact:</b>	Flush with lukewarm gently flowing water for 5 minutes or until product is removed.
<b>Eye Contact:</b>	No effects expected. If irritation does occur, flush contaminated eye(s) with lukewarm gently flowing water for 5 minutes or until product is removed. Remove contact lenses, if present and easy to do.
