

Vaxxon Gumboro 2

Indication

To induce immunity to Infectious Bursal Disease (IBD) [Gumboro Disease] in one-day-old chicks that lack maternal antibody (one-day-old chicks or chicks from hatching eggs imported from New Zealand).

Presentation

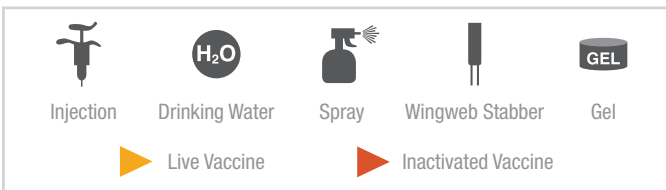

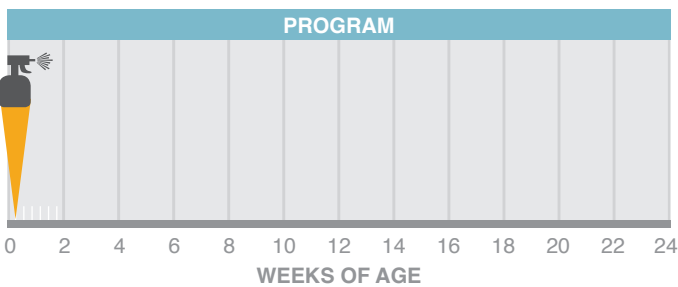

1000 doses of live freeze dried intermediate Infectious Bursal Disease (IBD) vaccine per vial. Each dose comprises 10^3 EID₅₀ IBD virus Winterfield 2512 strain, 53rd passage.

Vaccination Program

One-day-old chicks receive Vaxxon Gumboro 2 during placement in the brooding area.

Vaccine Administration

At one day-of-age administer Vaxxon Gumboro 2 by spray.

Precautions

Store refrigerated at 2 to 8°C. Do not allow to freeze. Do not expose to disinfectants or heat.
