

Vaxxon FC

Indication

For active immunisation against Fowl Cholera.

Presentation

1000 doses of inactivated *Pasteurella multocida* Serotypes 1, 3 & 4 in oil emulsion per 500 ml bottle

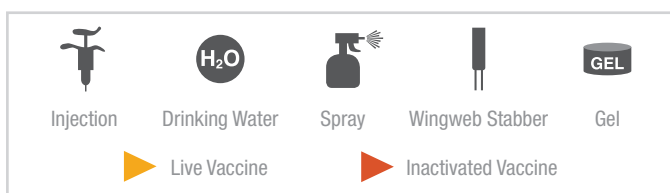

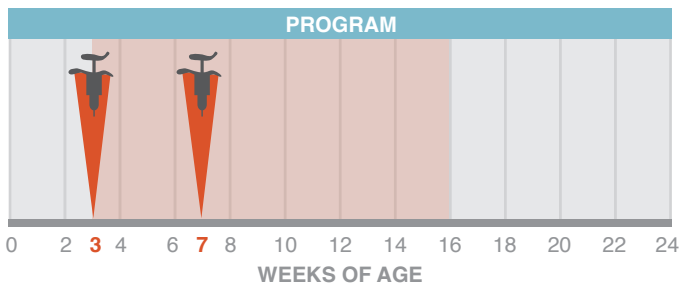

Vaccination Program

Two vaccinations with Vaxxon FC between 3 and 16 weeks of age with an interval of 4 weeks between the first and second vaccination.

Vaccine Administration

From 3 weeks of age to 16 weeks of age administer 0.5 ml Vaxxon FC by subcutaneous injection.

There should be an interval of 4 weeks between the first and second administration of Vaxxon FC.

Precautions

Store refrigerated at 2 to 8°C. Do not allow to freeze.

Allow the vaccine to reach room temperature (22°C) before use.

Shake well before and during use. After opening use within 10 hours.

In case of accidental human injection seek immediate medical attention.

Vaccinate healthy birds only.

See Vaxxon FC package insert for detailed Directions for Use.

Vaxxon FC registered pursuant to the ACVM Act 1997, No. A11231. See www.foodsafety.govt.nz for registration conditions.
